

## Building supply and distribution (Higher Electrical Building Technology series of textbooks)

Filesize: 5.37 MB

### ***Reviews***

*This ebook could be well worth a study, and superior to other. It really is basic but unexpected situations inside the 50 % of your ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

***(Prof. Buford Ziemann)***

To get **Building supply and distribution (Higher Electrical Building Technology series of textbooks)** PDF, please refer to the button listed below and save the file or get access to additional information which are relevant to BUILDING SUPPLY AND DISTRIBUTION (HIGHER ELECTRICAL BUILDING TECHNOLOGY SERIES OF TEXTBOOKS) ebook.

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 407 Publisher: China Construction Industry Pub. Date :2008-06-01 version 1. This book is the institutions of higher learning architectural electrical technology. automation of teaching the book. The book is divided into eleven chapters. the main contents include: building supply and distribution system and load calculations; construction for the main wiring distribution. structure and layout; electrical grid short-circuit current calculation and equipment selection; wire and cable options; high-rise buildings against Ray and grounding system; save power and reactive power compensation; building supply and distribution system of automatic devices and automatic monitoring system; urban planning and residential construction site temporary power and so on. This book may also be relevant for higher education students. also available in building supply and distribution. industrial and mining supply and distribution design. construction and operation management. Contents: Chapter 1 Introduction Section II building supply and distribution system rated voltage power system architecture for the third quarter of the load distribution on the power requirements of Section IV classification and distribution architecture for the design of the content. procedures and requirements Chapter building load calculation for the distribution of the load calculation section of the meaning and purpose of calculating the main characteristics of electrical equipment Section II Section III Section IV load curve and load calculation method of section V of the computational load demand load calculation method Section VI of the application and evaluation of the power supply and distribution system losses and calculate the energy requirements outlined in Section II Chapter III substation transformer capacity and the number of units to determine the main wiring Section III Love electrical substation Section V of the main electrical substation equipment. the control signal...
